

§ 1924.251

2. Tentative approval of local or State health authority for individual water and/or wastewater disposal systems when it is clear that central systems are unfeasible at this time. Use §1924.108(a)(5) of this subpart when preparing information required.

H. *Facility Acceptance*. Evidence that the appropriate public body is willing to accept and maintain streets, common areas, lighting, fire hydrants, sidewalks, drainageways, and utilities, as appropriate, when dedicated to said body.

I. *Preliminary Specifications*. Outline specifications describing all the proposed materials to be used and how they are to be applied. These are only the materials used in the land development and construction of the streets, drainage, and utility work.

J. *Incremental Slopes Plan*. If areas of common slope are not identified elsewhere in adequate detail, this information should be provided in a separate plan.

K. *Preliminary Grading Plan*. This plan will indicate degree of work required to provide positive drainage of all building sites and control measures to be taken to eliminate soil erosion. Dwelling locations may be shown if they can be predetermined.

L. *Other*. The applicant will need to submit any additional information that may be needed as indicated in the respective loan program regulations as indicated in part 1944, subparts D and E and part 1822, subpart F of this chapter (FmHA or its successor agency under Public Law 103-354 Instruction 444.7). This may include but not be limited to:

1. A detailed trade-item cost breakdown of the project for such items as land and right-of-way, building construction, equipment, utility connections, architectural/engineering and legal fees, and both on- and off-site improvements. The cost breakdown also should show separately the items not included in the loan, such as furnishings and equipment. This trade-item cost breakdown should be updated just prior to loan approval.

2. Information on the method of construction, on the proposed contractor if a construction contract is to be negotiated and on the architectural, engineering, and legal services to be provided.

3. For all projects containing over four units the applicant will submit an Affirmative Fair Housing Marketing Plan for approval by FmHA or its successor agency under Public Law 103-354 in accordance with §1901.203 of subpart E to part 1901 of this chapter. The Affirmative Fair Housing Marketing Plan must be prepared in a complete, meaningful, responsive and detailed manner.

4. A description and justification of any related facilities (including but not limited to workshops, community buildings, recreation center, central cooking and dining facilities, or other similar facilities to meet essential

7 CFR Ch. XVIII (1-1-05 Edition)

needs) to be financed wholly or in part with loan funds.

III. *Technical Documents Necessary for the Obligation of Funds*. All decisions regarding the conceptual design of the proposed project should be made prior to this submission. This effort is mainly to demonstrate that those agreed upon concepts have been transformed into construction documents and the necessary approvals have been granted. All items requiring revision or more detailed information as determined by the review of the preliminary submission will be resolved before the sponsor prepares the final submission. All documents shall be executed in a professional manner and shall carry the appropriate designation attesting to the professional qualifications of the architect, engineer, land surveyor or site planner. All documents will be accurately drawn at an appropriate scale.

Subparts D-E [Reserved]

Subpart F—Complaints and Compensation for Construction Defects

SOURCE: 56 FR 40241, Aug. 14, 1991, unless otherwise noted.

§ 1924.251 Purpose.

This subpart contains policies and procedures for receiving and resolving complaints concerning the construction of dwellings and construction, installation and set-up of manufactured homes (herein called “units”), financed by the Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354, and for compensating borrowers for structural defects under section 509(c) of the Housing Act of 1949, as amended. Provisions of this subpart do not apply to dwellings financed with guaranteed section 502 loans.

§ 1924.252 Policy.

FmHA or its successor agency under Public Law 103-354 is responsible for receiving and resolving all complaints concerning the construction of dwellings and the construction, installation and set-up of units financed by FmHA or its successor agency under Public Law 103-354. FmHA or its successor agency under Public Law 103-354 must

determine whether defects are structural or non-structural. If the defect is structural and is covered by the builder's/dealer-contractor's (the "contractor") warranty, the contractor is expected to correct the defect. If the contractor cannot or will not correct the defect, the costs of correcting the defect may be paid by the Government, or the borrower may be compensated for correcting the defect, under the provisions of this subpart. If the defect is non-structural but is covered under the provisions of the contractor's warranty or independent home warranty, the contractor is still expected to correct the defect. FmHA or its successor agency under Public Law 103-354 will assist the borrower in obtaining assistance through the independent home warranty company's and/or manufacturer's complaint resolution process. However, if the contractor cannot or will not correct a non-structural defect covered under the provisions of the contractor's warranty, the Government will not pay the costs for correcting the defect, nor will the borrower be compensated for doing so.

§ 1924.253 Definitions.

As used in this subpart, the following definitions apply:

(a) *Newly constructed dwelling.* One which:

(1) Is financed with a section 502 insured loan;

(2) Was constructed substantially or wholly under the contract method, or under a conditional commitment, or, as to only work performed by a contractor or covered by a manufacturer's warranty, under the mutual self-help program;

(3) Was not more than one year old and not previously occupied as a residence at the time financial assistance was granted unless FmHA or its successor agency under Public Law 103-354 has extended the conditional commitment issued on a newly constructed dwelling in accordance with 7 CFR part 3550; and

(4) Had the required construction inspections performed by FmHA or its successor agency under Public Law 103-354, the Department of Housing and Urban Development (HUD), or the Veterans Administration (VA).

(b) *Newly constructed manufactured home (unit).* One which:

(1) Is financed with a section 502 insured loan;

(2) Was not more than one year old and not previously occupied as a residence at the time financial assistance was granted; and

(3) Is built to the Federal Manufactured Home Construction and Safety Standards (FMHCSS) and is certified by an affixed label as shown in exhibit J of subpart A of part 1924 of this chapter.

(c) *Non-structural defect.* A construction defect which does not affect the overall useful life, habitability, or structural integrity of the dwelling or unit. Some non-structural defects may be covered under the contractor's warranty. Examples of non-structural defects include, but are not limited to:

(1) Cracks attributed to normal curing or settlement.

(2) Cosmetic defects in cabinets, woodwork, floorcovering, wallcovering, ornamental trim, etc.

(3) Improper or incomplete seeding or sodding of yard, or failure of trees, shrubs, grass and other landscaping items to thrive.

(4) Improper grading of yard, unless the grade is causing damage which may lead to a structural defect.

(d) *Structural defect.* A defect in the dwelling or unit, installation or set-up of a unit, or a related facility or a deficiency in the site or site development which directly and significantly reduces the useful life, habitability, or integrity of the dwelling or unit. The defect may be due to faulty material, poor workmanship, or latent causes that existed when the dwelling or unit was constructed. The term includes, but is not limited to:

(1) Structural failures which directly and significantly affect the basic integrity of the dwelling or unit such as in the foundation, footings, basement walls, slabs, floors, framing, walls, ceiling, or roof.

(2) Major deficiencies in the utility components of the dwelling or unit or site such as faulty wiring, or failure of sewage disposal or water supply systems located on the property securing the loan caused by faulty materials or improper installation.
